

This recycled do-it-yourself animal toy project is designed to inspire connection and creativity between parents, children, friends, and animals. Recycling old materials and giving them new purpose is a great way to inspire creativity. Making toys for animals is a great way to help children become more sensitive to and communicate with animals.

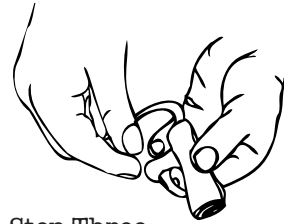

Step One:

Flatten your flag shaped peice of wool on a hard surface. Grab the long narrow tail, as above.

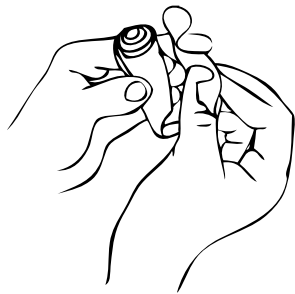

Step Two:

Starting with the tail, roll tightly and evenly to the opposite end.

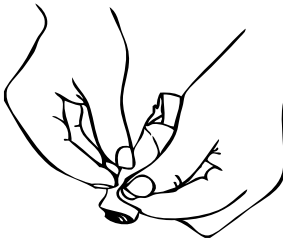

Step Three:

When the wool is rolled , hold it tightly while you pick up the woolen tie.

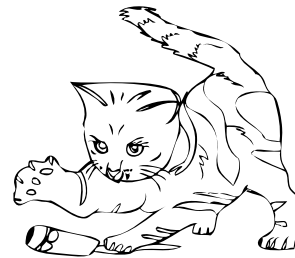

Step Four:

Wrap the woolen tie around the top of the mouse's body. (opposite the tail.)

Step Five:

Pull the woolen tie tightly and make a knot to form the mouse's ears.

Step Six:

Congratulations, you are done! To celebrate, find a pet that you would like to share your recycled do-it-yourself toy with, and the two of you can play!
